

DEPLOYMENT OF APPLICATION IN IBM CLOUD

DEPLOY IN KUBERNETES CLUSTER

The screenshot shows the IBM Cloud console interface for a Kubernetes cluster named 'mycluster-free'. The browser address bar displays 'cloud.ibm.com/kubernetes/clusters/cdhucmqf0l9dqs7s18g0/overview'. The page features a sidebar with navigation options: Overview (selected), Worker nodes, Worker pools, and DevOps (marked as 'New'). A prominent warning banner at the top states: 'Expires in 25 days: Be sure to back up your data, your cluster will be deleted in 25 days. To access the full capabilities of the service, try out a standard cluster.' Below this, four status cards are displayed: 'Node status' (1 of 1, Normal), 'Add-on status' (0 of 0, Normal), 'Master status' (Normal), and 'Ingress status' (Unknown). A 'Details' section provides further information: Cluster ID 'cdhucmqf0l9dqs7s18g0', Version '1.24.7_1542', Infrastructure 'Classic', Zones 'Mitan 01', Created '11/3/2022, 9:33 PM', Resource group 'Default', and an 'Image security enforcement' toggle set to 'Enable'. The bottom of the image shows a Windows taskbar with a weather widget indicating 29°C and 'Mostly sunny'.
